

Finding Publications in EBSCO Resources

Search for publications by title in any EBSCO resource.

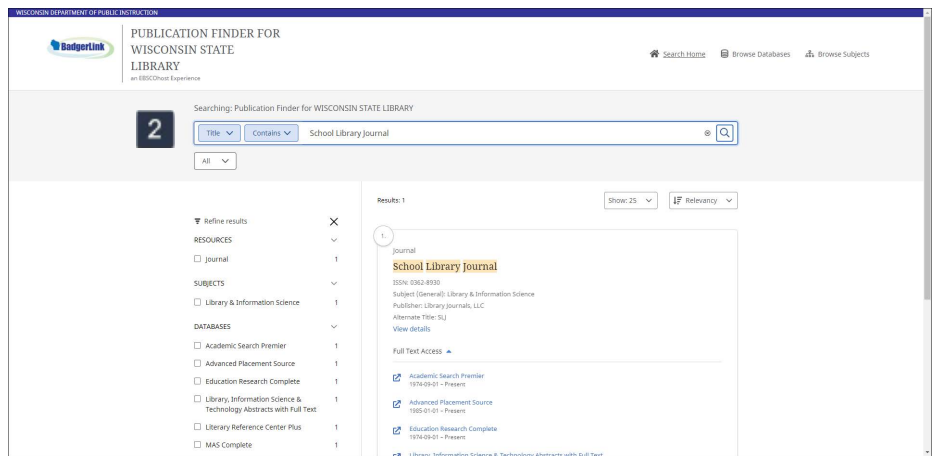

1 From any EBSCO resource homepage, click on Publications, found on the lower left side of the page.

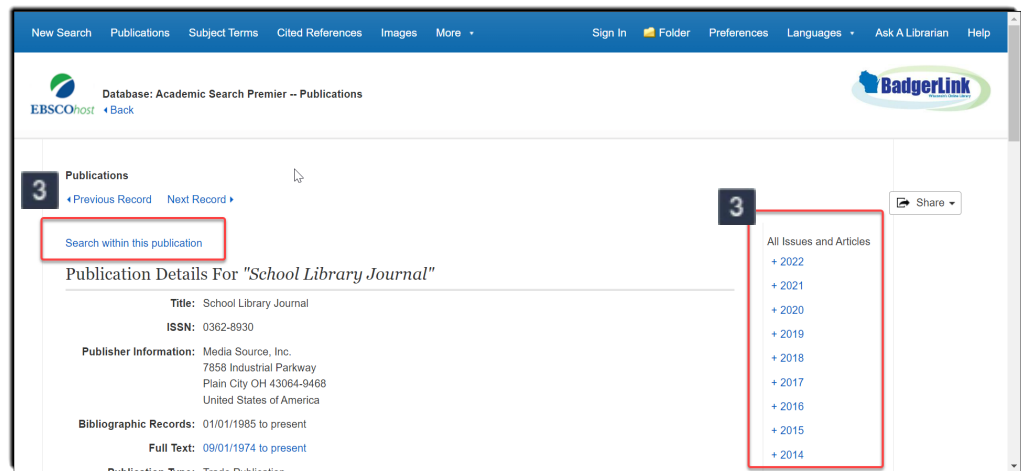

2 Enter the publication title in the Search Publications box and click the magnifying glass.

If the title is available in BadgerLink resources, it will appear, listing the resource and dates of coverage available.

Click the resource link to view publication record.

3 The publication record displays issues by date, or, to search for a specific article or topic, click on "Search within this publication."

Clicking "Search within this publication" populates the search with JN "School Library Journal" which will search for articles from School Library Journal. Add "and" before refining your search with an article or keywords.
